

## **Cannova® Red Flame Canna**

***Canna 'Cannova Red Flame'***

Height: 4 feet

Spread: 20 inches

Sunlight: ☉

Hardiness Zone: 7

Group/Class: Cannova Series

### **Description:**

A tropical look in the garden with huge, lush green leaves; large flowers that are red-orange with yellow petal edges, on top of this medium height variety; perfect for borders or as an accent; perennial only where roots don't freeze

### **Ornamental Features**

Cannova Red Flame Canna features bold spikes of red flag-like flowers with orange overtones and yellow edges at the ends of the stems from mid summer to mid fall. Its attractive large pointy leaves remain green in color throughout the year. The fruit is not ornamentally significant.

### **Landscape Attributes**

Cannova Red Flame Canna is an herbaceous evergreen perennial with a rigidly upright and towering form. Its wonderfully bold, coarse texture can be very effective in a balanced garden composition.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting hummingbirds to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spreading

Cannova Red Flame Canna is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
- Container Planting

## Planting & Growing

Cannova Red Flame Canna will grow to be about 4 feet tall at maturity, with a spread of 20 inches. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years.

This plant should only be grown in full sunlight. It requires an evenly moist well-drained soil for optimal growth, but will die in standing water. It is not particular as to soil pH, but grows best in rich soils. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Cannova Red Flame Canna is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
